COMPUTER SYSTEMS

CMSY-105 Personal Computer Systems Repair I (3 credits)

Students will have hands-on experience using 486 and Pentium based systems. The course will focus on broad concepts and diagnostic tools which allow the student to rapidly determine the condition of a PC system and how best to rectify a fault. Special emphasis will be placed on how systems are configured, modified, and expanded to meet new requirements. Different software tools like Checkit-Pro, Norton Utilities and DOS utilities will be used to diagnose problems. This course, along with CMSY-106, prepares students for the hardware level of A+ certification offered by the Computing Industry Association. The material is preparatory for the follow-on course, CMSY-106, Personal Computer Systems Repair II. Familiarity with DOS and Windows is recommended.

LAUREL COLLEGE CENTER:
2248 J552 6:00PM-10:00PM TH LCTBA
Fees: \$100.00.

CMSY-110 Software Applications for Micros (3 credits)

After successful completion of this course, the student will be able to use word processing, spreadsheet, database, and presentation graphic software. This course is designed for the beginning student and does not include advanced concepts. Keyboarding skills are strongly recommended.

All sections use Microsoft Word, Excel, Access, and PowerPoint.

ENGL-121 College Composition I: Expository Writing (3 credits)

ENGL-121 is the first of a two-semester sequence of college-level composition courses. (ENGL-122 is the second course in the sequence for most HCC degree programs. ENGL-121 transfers as university-parallel freshman English.) ENGL-121 guides students through the expository writing process through close reading of contemporary critical discourse and teaches the rhetorical arts of argument and persuasion through critical thinking, reading and research. Students will develop an understanding of themselves as readers and writers of culture as they participate in public discourse about writing; examine the relationship among writer, audience, and purpose; and practice writing prose through a recursive process. Students completing this course should be able to write persuasive, researched and documented essays (of at least 1,000 words) demonstrating the conventions of standard written English and manuscript presentation.

PRQ: Eligibility to enroll in ENGL-121 is based on English placement test scores or the successful completion of required developmental English course work.

HIST-123 Western Civilization and the Modern World (3 credits)

The student will be able to describe the history and development of Western Civilization and its impact on the world from 1815 to the present. The student will identify and analyze the political, economic and intellectual movements that influenced the Western European mind. The student will examine the character of the evolving modern nation state system through the wars of unification, overseas expansion, and the competitive national rivalries. The student will evaluate the underlying factors influencing the events that shaped the modern world, including two World Wars and the Cold War. The student will examine how the post-

1945 conditions affected the attitudes and makeup of the former colonial world. This course was formerly HY 102.

PRQ: Eligible to enroll in ENGL-121

Fees: \$15.00.

HOSPITALITY MANAGEMENT

HMG1-101 Introduction to the Hospitality Industry (3 credits)

This introductory course acquaints the student with the scope and complexity of the hospitality industry by exploring the national and global relationships of lodging, food, and beverage operations. The course examines career opportunities, organizational structures, history and human resource management. Students will examine trends, integrated technology and its effects on customer and guest service in requirements in the lodging and food service industry.

Fees: \$30.00.

HUMAN DEVELOPMENT

HMDV-200 Life Span Development (3 credits)

The purpose of this course is to examine the growth and development of an individual throughout his/her life. Beginning with the prenatal period and continuing through old age, development from a physical, intellectual, social and emotional perspective will be studied. Theories on development and current research in the field will be reviewed with an emphasis on application of individual case histories and personal experiences. This course meets the Maryland State Department of Education Child Development requirement for an initial certificate in Early Childhood Education, Elementary Education, and Secondary Education.

NOTE: For a prerequisite waiver call Division Chair, 410-772-4019.

MATHEMATICS

MATH-060 Basic Mathematics (2 credits)

In this course students will improve their arithmetic skills using signed numbers, fractions and decimals. Factoring numbers into products of primes; conversions between decimals, fractions and percents; ratio and proportion; place value and least common multiples will also be included. The use of a scientific calculator as a problem solving tool is also taught. This course is taught using computer-assisted instruction. You must plan to spend extra time on campus in our open computer labs.

PRQ: Appropriate score on math placement test and ENGL-093

LAUREL COLLEGE CENTER:

Fees: \$50.00.

MATH-061 Basic Algebra and Geometry (4 credits)

In this course students will be introduced to algebraic topics such as working with integers, simplifying numeric expressions with exponents, combining similar terms, multiplying polynomials and evaluating algebraic expressions. They will learn to distinguish among examples of the commutative, associative and distributive properties. Students will solve first degree equations, solve and graph linear inequalities on a number line, graph lines and investigate slope, and the x- and y- intercepts. They will become familiar with elementary topics in geometry. This course is taught using computer assisted instruction. You must plan to spend extra time on campus in our open computer labs.

MATH-067 Review of Algebra With Geometry Applications (4 credits)

In this course, the student will develop skills in manipulating algebraic expressions with integer exponents and in simplifying polynomials, rational expressions and radicals. The student will write an equation for a line from given information. Systems of equations will be solved graphically and algebraically. Methods of factoring second-degree polynomials and applications involving factoring will also be included. The ability to solve equations will be expanded

to include rational expressions and quadratics. The quadratic formula will be introduced. Application problems will include the use of the Theorem of Pythagoras. Classes offered in HR326 A&B and HR328 are computer-based instruction. Additional time is required in the computer lab. All sections require the use of the interactive computer program that comes with the text. PRQ: Appropriate score on math placement test.

MATH-070 Intermediate Algebra (3 credits)

The emphasis of this course is on using algebraic and graphical techniques to model and solve real world application problems. The use of a graphing calculator is required. Topics will include linear, quadratic, exponential, and logarithmic functions, rational exponent equations (both linear and quadratic), radical equations, linear and nonlinear systems, use of the discriminant, and inverse functions. Familiarity with rational expressions and equations is assumed. PRQ: MATH 065 or MATH 067 or appropriate score on math placement test.

MATH-128 Concepts of Mathematics II (4 credits)

This course is the second course in a sequence intended for students in the elementary and early childhood education programs. Topics include statistics, probability, metric and non-metric geometry, dimensional analysis, congruence and similarity, and coordinate and transformational geometry. Throughout the course special emphasis is given to problem-solving techniques including the appropriate use of calculators and computers.

MATH-131 College Algebra (3 credits)

Students will further algebraic skills with the concept of functions as a tool to model the real world playing a central role. Polynomial, rational, exponential and logarithmic functions will be studied, along with techniques for solving equations and inequalities, complex numbers, operations on functions and inverse functions. A graphical approach will be utilized

throughout with an emphasis on solving application problems. This course is taught using computer assisted instruction. If you do not have the equipment at your home/office you must plan to spend extra time on campus in our open computer labs. The use of a graphing calculator is required.

SOCI-102 Social Problems (3 credits)

The general objective of this course is to give students a broad overview of contemporary problems both in America and around the world. This course will analyze social problems, both internationally and here in the United States using various sociological perspectives. We will focus on three general classes of social problems: problems of social inequality and conflict, problems arising within specific social institutions (family life, education, crime, and health care), and problems arising from social change (environmental crises, population growth, and social upheaval).

PRQ: Eligible to enroll in ENGL-121.
