The above section meets February 2 to March 18.  
Fees: \$200.00.

**CSCO-660 Building Cisco Remote Access Networks (3 credits)**

This course teaches students how to build a remote access network to interconnect central sites to branch offices and home office/telecommuters. Once the network is built, the course further shows students how to control access to the central site, as well as maximize bandwidth utilization over the remote links. This course prepares students to pass one of the CCNP certification exams.

PRQ: CSCO-272 or CCNA certification

**LAUREL COLLEGE CENTER:**  
2265 J550 5:30PM-10:30PM MW LCTBA  
The above section meets March 23 to May 13.  
Fees: \$200.00.

**COMPUTER SYSTEMS**

**CMSY-106 Personal Computer Systems Repair II (3 credits)**

Students will acquire a basic technical understanding of the function and operation of the major peripheral devices such as state-of-the-art data storage devices, display technology, printers, scanners, SCSI devices, multimedia devices, modems, and local area network devices. Emphasis will be placed on localizing and correcting common hardware problems, installing, configuring, maintaining, and testing PC systems. The student will also learn IRQ conflict resolution, I/O address setting, DMA channel conflict resolution, optimizing memory, fine tuning autoexec.bat, config.sys files and Windows initializing files (.ini files) and configuring sys-

tems with Windows. This course, along with the CMSY-105 prerequisite, prepares students for the hardware level of A+ certification offered by the Computing Industry Association.

PRQ: CMSY-105

**LAUREL COLLEGE CENTER:**  
3995 J550 6:00PM-10:15PM TH LCTBA  
Meets full semester.  
Fees: \$100.00.

**CMSY-110 Software Applications for Micros (3 credits)**

After successful completion of this course, the student will be able to use word processing, spreadsheet, database, and presentation graphic software. This course is designed for the beginning student and does not include advanced concepts. Keyboarding skills are strongly recommended.

All sections use Microsoft Word, Excel, Access, and PowerPoint.

**LAUREL COLLEGE CENTER:**  
7653 J011 8:30AM-11:40AM F LCTBA

This class meets Fri and Sat, Feb 27-28, Mar 13-14, Mar 27-28.  
Fees: \$50.00.

**CMSY-129 Principles of Internet (3 credits)**

In this course students learn about popular internet tools and applications as well as the underlying technologies. Students also learn how to evaluate information on the internet for identifying and protecting their computers and personal information from security threats, hoaxes, and scams. The class also introduces e-commerce, including intellectual property. Students also learn how to create web pages with XHTML. Familiarity with a computer, file management skills, and touch typing are strongly recommended for success in this class. Credit will only be granted for one of the following: CMSY-126 or CMSY-129. (3 hours weekly)

**LAUREL COLLEGE CENTER:**  
8151 J050 6:00PM-9:40PM TH LCTBA  
Fees: \$50.00.

**CMSY-181 Introduction to C++ Programming (4 credits)**

This course provides an introduction to the C++ programming methodology—from algorithm development and documentation to object-oriented programming. Upon successful completion, students will be able to write programs of moderate complexity and length which include standard data types, control structures, user written and library functions, arrays, structures, recursion, stream I/O, and simple classes and objects. Students should be familiar with Windows file management before enrolling in this course.

PRQ: CMSY-121 or CMSY-190 or CMSY-220

**LAUREL COLLEGE CENTER:**  
1500 M011 12:00PM-2:30PM MW LCTBA  
Fees: \$50.00.

**CMSY-190 Introduction to Visual Basic.NET (3 credits)**

This course will give students an introduction to Visual Basic. Students will write several projects during the course. Students should be familiar with Windows file management before enrolling in this course.

PRQ: Eligible to enroll in ENGL-121 and MATH-061.

**LAUREL COLLEGE CENTER:**  
7312 J055 6:00PM-10:15PM W LCTBA  
Fees: \$50.00.

**CMSY-218 Operating System Fundamentals (3 credits)**

Learn how to use the Command Prompt (DOS) and Windows operating systems to create, view, and manage files, directories, and disks. Other topics include file attributes, supporting and troubleshooting Windows, and hard drive maintenance. This course includes beginning through advanced operating system concepts designed to prepare you to take the operating system part of the A+ certification exam.

### ENGL-121 College Composition I: Expository Writing (3 credits)

ENGL-121 is the first of a two-semester sequence of college-level composition courses. (ENGL-122 is the second course in the sequence for most HCC degree programs. ENGL-121 transfers as university-parallel freshman English.) ENGL-121 guides students through the expository writing process through close reading of contemporary critical discourse and teaches the rhetorical arts of argument and persuasion through critical thinking, reading and research. Students will develop an understanding of themselves as readers and writers of culture as they participate in public discourse about writing; examine the relationship among writer, audience, and purpose; and practice writing prose through a recursive process. Students completing this course should be able to write persuasive, researched and documented essays (of at least 1,000 words) demonstrating the conventions of standard written English and manuscript presentation.

PRQ: Eligibility to enroll in ENGL-121 is based on English placement test scores or the successful completion of required developmental English course work.

### ENGL-122 College Composition II: Writing Through Literature (3 credits)

ENGL-122 is the second of a two-semester sequence of college-level expository writing courses. (ENGL-121 is the first course in the sequence.) ENGL-122 builds on argumentative, persuasive, close reading, and research skills using a variety of literary forms as the subject for discussion and writing. Students advance their understanding of themselves as readers and writers, including the understanding that they participate with others in responsible public discourse and have moral and ethical responsibilities in that discourse. Approaching writing as a recursive process, this course emphasizes scholarly inquiry, literary analysis, and research. Students completing this course should be able to write persuasive, researched, and documented essays (of at least 2,000 words) demonstrating effective communication, knowledge of literary conventions and the conventions of standard written English and manuscript presentation.

PRQ: Successful completion of ENGL-121.

## FINE ARTS

### FINE-103 Introduction to the Creative Arts (3 credits)

This course will introduce the students to the basic elements, principles, processes, materials, and inherent artistic qualities of theatre, music, dance, and the visual arts. Focus is on experiential learning using a creative dramatics approach. The course is geared toward students planning to work with elementary-age children as teachers, caregivers, and others specializing in child development. This course is a requirement for all transfer students pursuing the AAT Elementary Education degree.

#### LAUREL COLLEGE CENTER:

5570	M704	3:15PM-6:15PM	T	LCTBA
------	------	---------------	---	-------

Fees: \$30.00.

### FYEX-100 Strategies for Success (2 credits)

Strategies for Success is a two-credit course designed to guide first-year students towards interdisciplinary academic mastery. Building on skills introduced at the secondary level, students will experiment with and apply college-level academic and life skill strategies through experiential and collaborative learning and will select and integrate those strategies best suited for their own individual success.

#### LAUREL COLLEGE CENTER:

5991	J155	6:30PM-8:30PM	MW	LCTBA
------	------	---------------	----	-------

J155 runs from 3/18/09 to 5/15/09  
Fees: \$25.00

## HEALTH EDUCATION

### HEED-115 Personal and Community Health (3 credits)

This course will synthesize the important facts and concepts of a variety of college level courses including biology, physiology, anatomy, ecology, psychology, and sociology into a meaningful dialogue that will motivate the student to modify their health practices to a high level of effective and enjoyable living.

#### LAUREL COLLEGE CENTER:

2701	J302	10:15AM-11:45AM	TTH	LCTBA
2699	M350	6:00PM-9:10PM	W	LCTBA

### HEED-211 Nutrition (3 credits)

This course will provide students with a general understanding of nutrition and health. The functions and importance of fats, carbohydrates, proteins, vitamins and minerals, and the relationship between nutrition and exercise in weight management are included.

#### LAUREL COLLEGE CENTER:

6750	M304	8:30AM-10:00AM	MW	LCTBA

Section M360 begins on Saturday, January 31, 2009.

Fees: \$10.00.

## HISTORY

### HIST-111 American History to 1877 (3 credits)

A survey of American history through 1877.

PRQ: Eligible to enroll in ENGL-121.

#### LAUREL COLLEGE CENTER:

Fees: \$15.00.

**HIST-112 American History Since 1877 (3 credits)**

A survey of American history from the end of Reconstruction to contemporary times.  
PRQ: Eligible to enroll in ENGL-121.

**LAUREL COLLEGE CENTER:**  
5990 J952 6:30PM-9:40PM W LCTBA  
2868 J960 9:30AM-12:45PM S LCTBA  
Fees: \$15.00.

**HOSPITALITY MANAGEMENT**

**HMGT-101 Introduction to the Hospitality Industry (3 credits)**

This introductory course acquaints the student with the scope and complexity of the hospitality industry by exploring the national and global relationships of lodging, food, and beverage operations. The course examines career opportunities, organizational structures, history and human resource management. Students will examine trends, integrated technology and its effects on customer and guest service in requirements in the lodging and food service industry.

**LAUREL COLLEGE CENTER:**  
5510 M001 12:00PM-1:30PM MW LCTBA

**HUMAN DEVELOPMENT**

**HMDV-200 Life Span Development (3 credits)**

The purpose of this course is to examine the growth and development of an individual throughout his/her life. Beginning with the prenatal period and continuing through old age, development from a physical, intellectual, social and emotional perspective will be studied. Theories on development and current research in the field will be reviewed with an emphasis on application of individual case histories and personal experiences. This course meets the Maryland State Department of Education Child Development requirement for an initial certificate in Early Childhood Education, Elementary Education, and Secondary Education.

NOTE: For a prerequisite waiver call Division Chair, 410-772-4019.

PRQ: Eligible to enroll in ENGL-121

**LAUREL COLLEGE CENTER:**  
7337 J907 10:15AM-11:45AM MW LCTBA  
3961 M961 9:00AM-12:15PM S LCTBA

**MATHEMATICS**

**MATH-060 Basic Mathematics (2 credits)**

In this course students will improve their arithmetic skills using signed numbers, fractions and decimals. Factoring numbers into products of primes; conversions between decimals, fractions and percents; ratio and proportion; place value and least common multiples will also be included. The use of a scientific calculator as a problem solving tool is also taught. This course is taught using computer-assisted instruction. You must plan to spend extra time on campus in our open computer labs.

PRQ: Appropriate score on math placement test and ENGL-093

**LAUREL COLLEGE CENTER:**  
5251 J465 12:00PM-1:00PM MW LCTBA  
5252 J475 6:15PM-7:15PM TTH LCTBA  
Fees: \$50.00.

**MATH-061 Basic Algebra and Geometry (4 credits)**

In this course students will be introduced to algebraic topics such as working with integers, simplifying numeric expressions with exponents, combining similar terms, multiplying polynomials and evaluating algebraic expressions. They will learn to distinguish among examples of the commutative, associative and distributive properties. Students will solve first degree equations, solve and graph linear inequalities on a number line, graph lines and investigate slope, and the x- and y- intercepts. They will become familiar with elementary topics in geometry. This course is taught using computer assisted instruction. You must plan to spend extra time on campus in our open computer labs.

PRQ: MATH-060 or appropriate math placement score and ENGL-093

**LAUREL COLLEGE CENTER:**  
3608 J430 9:00AM-2:30PM S LCTBA  
5253 J465 12:00PM-1:50PM MWF LCTBA  
5257 J475 6:00PM-8:40PM MW LCTBA  
Fees: \$50.00.

**MATH-067 Review of Algebra With Geometry Applications (4 credits)**

In this course, the student will develop skills in manipulating algebraic expressions with integer exponents and in simplifying polynomials, rational expressions and radicals. The student will write an equation for a line from given information. Systems of equations will be solved graphically and algebraically. Methods of factoring second-degree polynomials and applications involving factoring will also be included. The ability to solve equations will be expanded to include rational expressions and quadratics.

The quadratic formula will be introduced. Application problems will include the use of the Theorem of Pythagoras. Classes offered in HR326 A&B and HR328 are computer-based instruction. Additional time is required in the computer lab. All sections require the use of the interactive computer program that comes with the text. PRQ: Appropriate score on math placement test.

**LAUREL COLLEGE CENTER:**  
5250 J465 12:00PM-1:50PM MWF LCTBA  
5258 J475 6:00PM-8:40PM TTH LCTBA  
Fees: \$50.00.

**MATH-070 Intermediate Algebra (3 credits)**

The emphasis of this course is on using algebraic and graphical techniques to model and solve real world application problems. The use of a graphing calculator is required. Topics will include linear, quadratic, exponential, and logarithmic functions, rational exponent equations (both linear and quadratic), radical equations, linear and nonlinear systems, use of the discriminant, and inverse functions. Familiarity with rational expressions and equations is assumed. PRQ: MATH 065 or MATH 067 or appropriate score on math placement test.

**LAUREL COLLEGE CENTER:**  
3624 J420 4:00PM-6:15PM TTH LCTBA  
5255 J465 10:15AM-11:30AM MWF LCTBA

**MATH-127 Concepts of Mathematics I (4 credits)**

This course is for students in the elementary education and early childhood education programs. Students will study the structural aspects of mathematics and the 'why' of arithmetical computations. Topics include sets, functions, logic, numeration systems, algorithms and their historical development, estimation, mental computations, and elementary number theory. Throughout the course special emphasis is given to problem solving techniques. Appropriate use of computers and calculators will be integrated into the course.

**MATH-131 College Algebra (3 credits)**

Students will further algebraic skills with the concept of functions as a tool to model the real world playing a central role. Polynomial, rational, exponential and logarithmic functions will be studied, along with techniques for solving equations and inequalities, complex numbers, operations on functions and inverse functions. A graphical approach will be utilized throughout with an emphasis on solving application problems. This course is taught using computer assisted instruction. If you do not have the equipment at your home/office you must plan to spend extra time on campus in our open computer labs. The use of a graphing calculator is required.

**MATH-145 Business Calculus (3 credits)**

In this course students will develop skills in initial content of both differential and integral calculus. Polynomial, rational, exponential and logarithmic functions will be studied. Applications dealing with optimization, related rate, revenue, cost, profit, elasticity, and areas will be presented. This course uses the graphing calculator, a computer algebra system, and the interactive computer program that comes with the text. If you do not have the computer capability available at your home/office then you must plan to spend extra time on campus in our open computer labs. Students can not receive credit for both MATH-145 and MATH-181.

**PHIL-102 Introduction to Logic (3 credits)**

An introduction to both the practice and study of reason. Taking the essence of reason to be argument—a set of premises supporting a conclusion—the basic notions of validity, truth, soundness, strength and cogency will be studied and applied to ordinary language, culminating in a survey of what are known as informal fallacies. Two elements of formal symbolic logic will then be studied and practiced: categorical syllogism (Aristotelian and Boolean) and propositional logic (not including predicate logic). These elements have a distinctly mathematical feel; the final element of the course will return to a less formally rigorous study of inductive logic, scientific method and reason in general. (3 hours weekly)
