

Howard Community College
ITB: Landscape Management Services
Bid Number: 22-006
ITB Opening Date: April 20, 2022

ADDENDUM No. 2

Q1. The turf around the athletic building is fenced off in a lot of areas. Is that to be included?

Turf around the athletic building should be included.

Q2. There are beds that have excess mulch on them, are we looking at doing mulch reduction as needed?

The college expects mulch reduction to be performed as needed.

Q3. It looks like none of the beds have been edged or mulched this year. Is that happening or will that happen after the contract has been awarded? It looks like the beds along Little Patuxent Parkway have not been weeded in a long time so not sure if they get the rest of the maintenance like the beds around the campus buildings.

The beds are scheduled to be edged and weeded prior to the start of the new contract. The beds along Little Patuxent Parkway should be included in the maintenance contract.

Q4. 1.6 Turf Management – it states we must replace turf next to paths due to snow damage. Is the repair seed and soil or SOD? Is your snow vendor responsible for paying this or is this billed to the college as an enhancement service?

The expected repair is to seed and soil, which should be billed as an enhancement service.

Q5. 1.11 Leaf Removal – Is there a space on site for the organic waste to be stored for later use?

Yes.
