

Faculty and students of health sciences programs must submit proof of immunity for Measles (Rubeola), Mumps, Rubella, and Varicella. We recommend titer reports, but we do accept appropriate vaccination records [MMR (2), Varicella (2)]. If you have had the disease, you will need to submit a titer report to prove immunity. Immunity to hepatitis B is proven by submission of both, three hepatitis B vaccines and a positive titer; however, hepatitis B immunity may be waived. Please submit appropriate documentation with the completed health form.

If vaccination records are no longer available, please order the following:

- ❖ Titers:
 - IgG EIA Measles Antibody
 - IgG EIA Mumps Antibody
 - IgG EIA Rubella Antibody
 - IgG EIA Varicella Antibody
 - Hepatitis B Surface Antibody Quantitative Serum Titer
- ❖ If the student has either an *equivocal* or *negative* serologic test result, proof of appropriate booster is required per CDC recommendation.
IgM tests are not required.
- ❖ The student must have a documented testing for tuberculosis. The Quantiferon Gold or TSPot TB screening is recommended. However, the Two-Step PPD skin test may be used. (Second PPD is to be done 48-72 hours after first PPD reading has been done.) REVISED PLEASE CHECK
- ❖ A single PPD is required every year thereafter.
- ❖ Students with a history of a positive PPD or BCG vaccine must submit a copy of the Chest X-Ray Report as well as a Tuberculosis Questionnaire (included see page 5). The Tuberculosis Questionnaire is required every year thereafter.
- ❖ Proof of a current Tetanus vaccine within 8 years (so it will remain current throughout the program). Per CDC recommendations, one TDap must be given after attainment of age 19, while Td may be given subsequently.

❖ Tuberculosis

All students entering the HCC Health Sciences Division programs must have a TB test. Quantiferon Gold/TSPot is the standard test. The two step PPD is also an option for some facilities. A single PPD is required annually thereafter. Students with a history of a positive PPD skin test or BCG vaccination must submit a Chest X-ray report.
